### MAIN FEATURES

High security shredder suitable to shred "Classified" and "Top-Secret" documents. Touch screen shredder with auto feeder, all controls are activated by simply touching the panel. Double motor drive technology: equipped with two 24-hour continuous duty motors without overheating and duty cycles, carbon hardened cutting knives. Kobra 310 TS-AF HS can shred a sheet of paper in about 10.000 microchips which become absolutely unreadable even if special electronic optical microscopes are used. Energy Smart System and automatic disconnection from the mains for maximum power saving, EPC System displays real-time shredding load and helps the operator to optimize shredding efficiency. Kobra 310 TS line shredders can shred transparent material too: keep your finger for 5 seconds on the Forward control and the machine works continuously for 30 seconds.

- **Automatic Feeder:** shreds up to 170 sheets, whilst the operator can - at the same time - shred paper in the main throat and CDs/DVDs/Credit cards through the dedicated CD cutting unit. Equipped with the patented anti-jamming special system in case the operator feeds the machine with crumpled or stapled paper.
- **Super Potential Power Unit:** heavy duty chain drive system with steel gears - Carbon hardened cutting knives
- **Continuous duty shredding:** 24 hour continuous duty motors without overheating and duty cycles
- **EPC Electronic Power Control:** shows the shredding load required to optimize shredding without jams
- **Automatic Oiler:** integrated automatic oiling system to lubricate the cutting knives
- **Energy Smart System:** the machine goes into power saving stand-by mode after just 8 seconds of non-operation
- **Automatic disconnection** from the mains after 4 hours of non-operation, no need to switch off the shredder
- **Touch Screen Panel** with LED indicators: just touch the controls to activate the machine functions
- **Automatic Start & Stop** through electronic eyes - **Safety Stop** at the door opening and/or full waste bag
- **Automatic Reverse** in case of jamming

**AUTOMATIC FEEDER**

It can shred automatically 170 sheets, whilst the operator can shred paper in the main throat and CDs/DVDs/Credit through the dedicated cutting unit, at the same time.

**LOCKABLE COVER (LK)**

The lockable cover protects top-secrets or confidential documents waiting to be shredded when the shredder is left unattended. It is supplied with high security non-duplicable key.

**AUTOMATIC OILING SYSTEM**

The Automatic Oiler eliminates the need to manually lubricate the unit. It protects the blades with anti-corrosive agents and ensures maximum reliability and efficiency.

**CD/DVD DEDICATED CUTTING UNIT**

Two entry openings and two sets of cutting knives for the separate insertion and shredding of paper and CDs/DVDs/credit cards. Two integrated and removable bins to separate shredded paper from plastic shreds.
